

Horizontal dimension line with values: 15730, 9500, 3000, 850, 525, 4750, 4750, 525, 850, 1740. The line is divided into segments by vertical tick marks. The total length is 15730. The segments are: 3000 (red), 850 (red), 525 (red), 4750 (black), 4750 (black), 525 (black), 850 (black), and 1740 (black). The first segment (3000) is highlighted in red.

Diagram of a beam of length 17186 mm. The beam is supported at the left end and has a pin support at 9500 mm from the left. The beam is subjected to a uniformly distributed load (UDL) of 3000 N/m over the first 850 mm. A point load of 525 N is applied at 850 mm from the left. A point load of 4750 N is applied at 4750 mm from the left. A point load of 4750 N is applied at 9500 mm from the left. A point load of 525 N is applied at 10350 mm from the left. A point load of 850 N is applied at 11200 mm from the left. A point load of 1740 N is applied at 12050 mm from the left.
